PROFILE

I started my journey as a self-taught web developer right out in December 2019 when I first discovered the best Javascript book ever, You Don't Know JS Yet. Ever since, I've fallen in love with web development and spend most of my days taking my "job" to the next level.

I've always had the tendency to code all my projects from scratch to learn how things work under the hood and being able to offer unique front end experiences.

Like many other people I enjoy spending my free time increasing my knowledge of Web Development and building new and challenging projects.
