

Andres Lemus

Profile

Senior React developer with a background in computer science. Focused on providing value to colleagues, stakeholders, and end-users, through meaningful contributions.

Employment History

Senior React Developer at Lean Solutions Group | Scrum with Jira

February 2021 — Current, Full-time.

Lead the front-end development of Efficiency and Ottomoto apps:

- Document contribution guidelines, which reduce new developers first contribution time from ~1.5 weeks to ~2 days.
- Reduce PR review time by almost 70% using trunk-based development, static analysis tools, integration + unit testing, and preview links per PR.
- Optimize the apps for maximum speed and scalability, by creating a resilient architecture where:
 - Business logic maps to hooks using react-query.
 - Design system maps to a component library built with TailwindCSS, TypeScript, HeadlessUIs, and advance react patterns (compound components, control props, etc).
- Mentor less-experienced developers, by:
 - Promoting a safe environment for asking questions and creating open channels to answer them.
 - Being ahead on the problems they may get and solve them before they get to it.
 - Giving introductory talks and resources where they could learn about libraries, technologies, and patterns used within the app.

Front end Developer at Keos | Scrum with Jira

November 2020 — January 2021, Full-time.

Led the UI development of different Keos products.

Front end Developer at FitHub | Scrum with Asana

September 2020 — October 2020, Contract.
