Andres Lemus

Front end Developer

👤 Profile

My front-end developer journey started when I first discovered the best JavaScript book ever, You Don't Know JS Yet. Ever since, I've fallen in love with web development and spend most of my days taking my craft to the next level.

I've always had the tendency to code all my projects from scratch to learn how things work under the hood and being able to offer unique front-end experiences.

Like many other people I enjoy spending my free time increasing my knowledge of Web Development and building new and challenging projects.

💼 Employment History

Security Developer at Fluid Attacks

May 2020 — Present

Part of the Integrates product team, a platform to control vulnerability testing and remediation processes.

- Implement UI features in a reusable and scalable way.
- Refactor the front-end code base using ESLint + Prettier + Plugins with its strict configuration, in order to increase code quality, code consistency and force new changes to follow these rules.
- Fix bugs related to logic and styling, following a full DevOps methodology.
- Increase the coverage of components unit testing and resolve asynchronous request testing issues that made the CI more reliable.

🎓 Education

Advance Frontend with React

Acámica

Systems Engineering

National University of Colombia

📊 Courses

CCNA 1 – 2 – 3

Cisco Networking Academy

Architecting with Google Compute Engine

Google Cloud Training

🌱 Extra-curricular activities

Host

National University of Colombia

Helping international and PEAMA students adapting to the city and university.
