Andres Lemus

Front end Developer

👤 Profile

Front end developer with a background in computer science. Focused on providing value to colleagues, stakeholders and end users, through meaningful contributions.

💼 Employment History

Front end Developer at Keos | Scrum with Jira

November 2020 — Current, Full-time.

Work in the UI development of different Keos products.

- Research libraries, implement patterns and lead the development of the new Blocks application UI.
- Reduced development time almost 50% by building an accessible, cross-browser compatible, responsive component library using React, TypeScript and TailwindCSS.

Front end Developer at FitHub | Scrum with Asana

September 2020 — October 2020, Contract.

Worked on the development of the new ecommerce UI for FitHub.

- Developed ~65% of the new ecommerce UI using React and Redux, which allow us to easily keep reusable and maintainable code.
- Reduced the load times of the website by 50%, using code splitting techniques with webpack 4.

Security Developer at Fluid Attacks | DevOps with Gitlab CI/CD

May 2020 — August 2020, Full-time.

Part of the Integrates product team, a platform to control vulnerability testing and remediation processes.

- Fixed bugs related to logic and styling.
- Refactored the front-end code base using ESLint + Prettier, which reduced bugs by 20% and increased code quality and consistency.
- Components using old patterns such as HOCs or render props were migrated to custom hooks, which reduced their code by 15% and made them easier to test.
- Increased Jest code coverage by 10% to ensure code reliability.

🎓 Education

Advance Frontend with React
